Amazon Future Engineer

Find your AFE track

Both include to up to $40,000 for college, a paid Amazon internship opportunity, and mentorship. You can only apply to one, so pick what track fits you best!

Software Development Engineer

Day In The Life

Write code to turn an idea into something real, then test it and make it better.

Choose This Track If

- You love writing code, solving puzzles, and figuring things out
- You've built (or want to build) an app, game, or website
- You prefer mostly desk-based work that involves meetings and collaboration

Schedule

You appreciate the consistency of standard business hours

Work Environment

At a computer on a tech team, in an office or on a tech campus with other engineers

Automation Engineer

Day In The Life

Work with robots and machines that keep things moving.

Choose This Track If

- You enjoy taking things apart to see how they work
- You're curious about robotics, machines, packaging, and conveyor systems
- You like hands-on work that keeps you moving and tinkering

Schedule

You like the flexibility that comes with shift work

Work Environment

On the floor of an Amazon fulfillment center, hands-on with robots and machines

Still not sure? Select the track that excites you most—your essays are where you'll bring it to life. Both have the same scholarship reward.
